

HB 1121 -- FIREARMS

SPONSOR: Parkinson

This bill allows those who have taken a course from a National Rifle Association instructor that is one hour or more in length to meet certain requirements required for concealed carry permits under Chapter 571, RSMo. However, under Missouri law specific portions of the currently required firearms course and all physical aspects such as the care, cleaning, and firing of guns will still be required in a course, that is not regulated as to length of time, taught by a qualified firearms safety instructor.
